Forecast For The United Kingdom
Issued by Met Office Exeter
at 1500 on Sunday 27 Jun 2021

UK Outlook for Monday 12 Jul 2021 to Monday 26 Jul 2021:
As is typical for the time of year, confidence is relatively low for this period, though the emphasis is for a lot of fine and dry weather for the rest of July. Occasional spells of rain are possible for northwestern areas, whilst there is a very low risk of thundery conditions at times, especially in the south. Temperatures are likely to be above average throughout, which increases the possibility of some very warm or hot spells occurring.
